

## SITE INSPECTION REPORT

Inspection Date(s) 4/27 & 4/29

Site Name: TUTU WELLS SITE

Site Address: ANNA'S RETREAT

### Persons Conducting Inspection:

(Identify EPA, State, Contractors, PRPs, Public, etc.)

C.Kwan-EPA, Henning Moe-CDM-FPC(EPA), Dan Nachman & Tom Danahy- Geraghty & Miller (TEIC), Alberto Gutierrez-H + GCL (Texaco), Jose Agrelot-Soil Tech (TEIC); Adrian Schottroff- DPNR

### Purpose of Inspection:

(Survey, data collection, field work, progress evaluation, etc.)

Meetings to discuss the EPA's comments on the Technical Memo #2 report. See attached Comment letter dated April 20, 1993

### Findings, Accomplishments, and Results:

need results from L'Henri 2 wells from L'Henri (requested to counsel, she will forward once received), Over 100 drums of soil cutting, conducted TCLP, all negative: wants DPNR's permission to dispose of them in Bivoni Landfill (I spoke w/Reed: said OK, Reed will forward a letter to TEIC). TEIC will installed 4 wells for Phase II- 1 at 4 wind parking lot front of Western Auto, 1 behind Western Auto (potential problem to get site access because the superintendent stated that the Court has an Order out that no work should be done in there; I informed TEIC to verify when they requested site access), 1 well at Ramsay property and 1 well between L'Henri and ESSO. In addition, TEIC will conduct another complete round of sampling. Schedules: June 1- mobilization (3 weeks of drilling), sampling: 2nd week in July (12th to 19th). EPA also requested they sample the VIHA well. There are no pump but TEIC will supply the pump if VIHA maintenance personnel will disconnect the non-work pump there is currently in that well. TEIC will also be installing a pressure transducer in Well #1D and 13D to see water level fluctuation of the pump for 2 weeks in June before they start sampling.

We requested the TEIC to sample L'Henri wells since we still don't have data from L'henri yet. The designated coordinator will get back to me once she speak with the committee itself.

We also conducted a site visit to locate the exact locations of the phase 2 wells.

259842

Follow-up and Recommendations:

(Correct problems, notification of appropriate EPA/State officials, PRPs, or contractor regarding problems, schedule for resolution, etc.)

The revise report is scheduled to be in my office by June 1, 1993. Originally, it was by May 24 but ORC has some problems with the languages in the report itself so ORC spoke with the TEIC counsel and went over the languages. We gave them an extra week to revise the languages along with our technical comments.
